Step 2 - Place yolk into a bowl large enough to hold the cream/milk later.

Step 3 - Heat the milk/cream mixture stirring all the time to stop it catching on the bottom, use a thermometer & when it reaches 76°C turn off the heat then pour a little into the yolk & whisk hard, repeat a little at a time until you have used about half the hot milk/cream mixture, then pour the rest in & whisk, sieve the hot ice cream back into the saucepan to remove all the bits, cover & allow to cool, then put in the fridge to go cold, add coffee liqueur.
